

The Beer Carousel - Monitor Quality Year-Round and See How You Compare to the Competition

Anonymous comparison of your beers with those from other breweries

- ✓ research into the causes of off-flavors, in order to identify and correct weak points in production
- ✓ improvement of quality over time, both internally and externally
- ✓ detect seasonal fluctuations
- ✓ manage fluctuations by adjusting equipment or processes (brew-house, raw materials, fermentation conditions, yeast management)
- ✓ evaluation in the form of tables and graphs
- ✓ interpretation of the results by experts

Results from tastings for fresh beer conducted according to the DLG method

Flavor scores for fresh beer samples

Month	Tested beer	Mean values for all beers
January	4.30	4.25
